

CCPM 8829 CBMS Employment First Indicator and Mobile App Updates

Purpose: To provide way for state users to identify which counties are offering the EF program and limit pending SNAP supportive payment requests to only these counties. This project will lessen administrative burden for counties receiving supportive payment requests for programs they do not operate.

Description: The EF indicator will appear on the Maintain Work Program section within the County House. Only state users with the Cash Program Override security access will have access to edit/modify this field. This will act as a filter for MyCOBenefits and PEAK client facing information based on counties identified as offering the EF program.

EF users will be able to request EF supportive payments in PEAK and MyCOBenefits only if their residing county is an **EF Program Operator**. If the client does not reside in an EF county, they will not have the option to request these payments.
